Dear Sir or Madam,

As a highly skilled Java Professional, I read your posting for a new opportunity with interest. I think my experience could align well with the qualifications you are seeking, in particular my role as Software Architect at foryouandyourcustomers, and I am certain I would make a valuable addition to your organisation.

Please review my attached resume for the details regarding my expertise.

In addition to my experience and personal qualities, I stay tuned on what is new out there, because new technologies and methodologies are always cool and interesting, but sometimes the old and well-known way could still be a valuable help. The difference lays in the approach: stay safe but don't be afraid to innovate.

I love thinking before doing, understanding before trying, evaluating every requirement, aspect and constraint.

I will follow up to request an appointment to discuss how my experience and background meets your needs.

Thank you for your time and consideration.

Sincerely,

Matteo Baiguini
